

**Update – July 28, 2009**

**FISTULA CARE OPENS AN OFFICE IN RWANDA**

Fistula Care has opened a project office in Kigali. The new staff will coordinate fistula treatment and prevention efforts in Rwanda. In addition, two members of the Fistula Care global team will be based in Rwanda to provide support to that program and to other programs in the region. A festive official opening ceremony is planned before the end of 2009. Through USAID support more than 500 women have had their lives transformed by fistula repair in Rwanda since 2006.
