Recently Released PBS Video Highlights Fistula Care's Supported Site in Sierra Leone

PBS FRONTLINE/World recently published a video that tells the story of Yeabu, a woman with obstetric fistula in Sierra Leone (http://www.pbs.org/frontlineworld/rough/2009/06/sierra_leone_ye.html). The video follows Yeabu from her home village to Mercy Ships' Aberdeen West Africa Fistula Center, a site supported by Fistula Care, and back to her village after a successful fistula repair surgery. The video highlights the importance of outreach to remote areas of the country to identify and transport women with fistula who otherwise would not have access to fistula repair surgery. To learn more about Fistula Care's work in Sierra Leone, please visit <http://www.fistulacare.org/pages/sites/sierra-leone.php>.
